

BEIXUAN DONG

Email: beixuan1@ualberta.ca Phone: 1-(825)-983-2602

Department of Mechanical Engineering, University of Alberta, 9211 115st NW, Edmonton, Canada, T6G 1H9

Webpage: <https://akili121.github.io/index.html#bio>

EDUCATION

University of Alberta, Edmonton, Canada Sep 2023–Present

Ph.D. in Engineering Management, Department of Mechanical Engineering | GPA: 3.8/4.0

Supervisors: Dr. Xinming Li and Dr. Lingzi Wu

Central South University, Changsha, China Sep 2020–Jun 2023

M.Sc. in Engineering Management, School of Civil Engineering | GPA: 3.6/4.0

Supervisor: Dr. Ming Shan

Central South University of Forestry and Technology (CSUFT), Changsha, China Sep 2016–Jun 2020

B.Eng. in Engineering Management, School of Civil Engineering | GPA: 4.0/4.0 | Rank: 1/73

VISITING RESEARCH APPOINTMENTS

University of Washington, Seattle, USA Jun–Aug 2025

Visiting Ph.D. Student, Department of Construction Management | Host: Dr. Lingzi Wu

National University of Singapore, Singapore Dec 2021–Jul 2022

Visiting Master's Student, Department of the Built Environment | Host: Dr. Bon-Gang Hwang

RESEARCH INTEREST

-
- AI application for infrastructure disaster management
 - Infrastructure resilience
 - Data-driven modeling
 - Graph neural network

Book & Book Chapter

- [1]. Yu D.M., Shan M., Li Y.G. (2021). *International Railway Project Risk Management*. Central South University Press.

Note: As a helper to draft Chapter 12 of the book, which is Construction Insurance and Surety Bonds.

RESEARCH EXPERIENCES

Data-Driven Modeling for Disaster Resilience in Road Networks

2023-present

Advised by Dr. Xinming Li and Dr. Lingzi Wu

- Synthesized methods for assessing short-term natural-disaster impacts on transportation infrastructure through a systematic literature review.
- Developed a graph neural network framework integrating structural, functional, and social-vulnerability features to assess and predict flood impacts on highway networks.
- Designed an equity-aware framework for prioritizing road restoration based on roadway function and the accessibility needs of socially vulnerable communities.
- Proposed an accessibility-based post-disaster road restoration approach, where each decision aims to maximize the marginal accessibility gain while accounting for dynamic social vulnerability.

Resilience of Urban Rail Transit Construction Projects

2020-2023

Advised by Dr. Ming Shan and Dr. Bon-Gang Hwang

- Identified attributes shaping the physical resilience of urban rail transit projects and the mental resilience of project contractors.
- Developed an agent-based model in AnyLogic to simulate interactions among disruptive events, infrastructure performance, and stakeholder well-being.
- Applied the model to a real-world case and derived strategies for improving project resilience.

GRANT PROPOSAL PARTICIPATION

Resilience in Urban Rail Transit Construction Projects, granted by the Natural Science Foundation of Hunan Province. PI: Dr. Ming Shan, CNY 150000

2022

TEACHING EXPERIENCE

Teaching Assistant, ENG M 632: Project Risk Management, University of Alberta

Jan–Apr 2026

- Graded assignments and provided feedback

Teaching Assistant, ENG M 620: Engineering Economic Analysis, University of Alberta

Jan–Apr 2026

- Graded assignments and provided feedback

Teaching Assistant, ENG M 530: Engineering Project Management, University of Alberta

Sep–Dec 2025

- Assisted in developing and revising assignments
- Supported students and graded assignments
- Stack question creation in Canvas

Teaching Assistant, ENG M 530: Engineering Project Management, University of Alberta

May–Jul 2024

- Independently delivered instruction on project scheduling
- Supported students and graded assignments

AWARDS AND SCHOLARSHIPS

Alberta Innovates Graduate Scholarship, University of Alberta	2025–2027 CAD 24,000
Academic Travel Grant, University of Alberta	2026 CAD 500
Academic Travel Grant, University of Alberta	2025 CAD 500
Second-Class Merit-Based Scholarship, Central South University	2021, 2022
First-Class Merit-Based Scholarship, Central South University	2020
Outstanding Undergraduate Graduate of Hunan Province	2020 Top 5%
National Scholarship for Undergraduate Students, China	2019 CNY 8,000 Top 1%
First-Class Merit-Based Scholarship, CSUFT	2016–2018 Top 5%

PROFESSIONAL SERVICE

Professional affiliations

Student Member – American Society of Civil Engineers (ASCE)

Reviewer Services

ASCE Journal of Construction Engineering and Management	2024–Present
